# Subject Index of Volume 159

Abrasion
a wear tester capable of monitoring and evaluating the movement pattern of abrasive particles in three-body abrasion, 115
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223
an abrasive wear study of ordered $Fe_3Al$, 241
Alloys
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223
study of fretting fatigue crack nucleation in 7075-T6 aluminum alloy, 257
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Aluminium
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223
an abrasive wear study of ordered $Fe_3Al$, 241
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201
study of fretting fatigue crack nucleation in 7075-T6 aluminum alloy, 257

Binary alloys
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Boundary lubrication
roughness effect of silicon nitride sliding on steel under boundary lubrication, 173

Cavitation
study of thermal profile and cavitation in a circular journal bearing, 79
Ceramics
diamond deposition on ceramic materials using the hot wire method, 67
Composites
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201
Corrosion
the relationship between erosion–corrosion metal wastage and temperature, 233
Crack nucleation
study of fretting fatigue crack nucleation in 7075-T6 aluminum alloy, 257
Cryogenic materials
tribological properties of cryogenic materials at 4 K in liquid helium under fretting conditions, 107

Diamond deposition
diamond deposition on ceramic materials using the hot wire method, 67
Dry sliding
dry sliding behaviour of steam treated sintered iron alloys, 127

Elastohydrodynamic analysis
optimum similarity analysis with applications to elasto-hydrodynamic lubrication, 57
Erosion
the relationship between erosion–corrosion metal wastage and temperature, 233

Fatigue
study of fretting fatigue crack nucleation in 7075-T6 aluminum alloy, 257
Fretting
characteristics of the fretting fatigue damage threshold, 43
study of fretting fatigue crack nucleation in 7075-T6 aluminum alloy, 257
tribological properties of cryogenic materials at 4 K in liquid helium under fretting conditions, 107
Friction
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201
friction and wear of high speed steel doped with low energy nitrogen ions, 185
Friction coefficients
friction coefficients of noble metals over a range of loads, 89

Graphite
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201

Hydrostatic journal bearing
hydrostatic journal bearing without pressure chambers between bearing surfaces, 31

Impact deformation
impact deformation and damage in austenitic high chromium white cast iron by spherical projectiles at normal incidence, 121
Indentation topography
three-dimensional characterization of indentation topography: visual characterization, 207
Intermetallic compounds
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Intermetallics
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Ion implantation
effect of ion implantation on friction and wear behavior of steels, 47
Iron
an abrasive wear study of ordered $Fe_3Al$, 241
Iron alloys
dry sliding behaviour of steam treated sintered iron alloys, 127

Journal bearings
an intelligent design system for recessed hydrostatic journal bearings, 95
study of thermal profile and cavitation in a circular journal bearing, 79

Kinematic energy
dissipation of kinematic energy by slip at the interface of mating surfaces, 141

Lubrication
lubrication performance of perfluoropolyalkylethers under high vacuum, 249

Metals
the relationship between erosion–corrosion metal wastage and temperature, 233

Nitrogen ions
friction and wear of high speed steel doped with low energy nitrogen ions, 185
Noble metals
friction coefficients of noble metals over a range of loads, 89
Normalized spectra
normalised spectra in monitoring of rolling bearing elements, 153

Parameter variation
comprehensive study of parameters for characterizing three-dimensional surface topography. Some inherent properties of parameter variation, 161
Particles
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223
Perfluoropolyalkylethers
lubrication performance of perfluoropolyalkylethers under high vacuum, 249
Point contact system
fully flooded, starved and parched lubrication at a point contact system, 135
Powder metallurgy
abrasive wear of powder metallurgy Al alloy 6061–SiC particle composites, 223

Rolling bearing elements
normalised spectra in monitoring of rolling bearing elements, 153
Roughness
digital image processing techniques, fractal dimensionality and scale-space applied to surface roughness, 17
roughness as a process with a non-integer spectral exponent, 39
roughness effect of silicon nitride sliding on steel under boundary lubrication, 173

Silicon
roughness effect of silicon nitride sliding on steel under boundary lubrication, 173
Silicon nitride
roughness effect of silicon nitride sliding on steel under boundary lubrication, 173
Similarity analysis
optimum similarity analysis with applications to elasto-hydrodynamic lubrication, 57
Sliding
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201
Solid solutions
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Steel
roughness effect of silicon nitride sliding on steel under boundary lubrication, 173
Steel doping
friction and wear of high speed steel doped with low energy nitrogen ions, 185
Structural–energetic concept
the structural–energetic concept in the theory of friction and wear (synergism and self-organization), 1

Thermal profile
study of thermal profile and cavitation in a circular journal bearing, 79
Three-dimensional surface topography
comprehensive study of parameters for characterizing three-dimensional surface topography. Some inherent properties of parameter variation, 161

Vacuum
lubrication performance of perfluoropolyalkylethers under high vacuum, 249

Wear
an abrasive wear study of ordered $Fe_3Al$, 241
friction and wear of aluminum–graphite composites: the smearing process of graphite during sliding, 201
friction and wear of high speed steel doped with low energy nitrogen ions, 185
wear of binary alloys — difference in wear mode between solid solutions and intermetallic compounds, 191
Wear tester
a wear tester capable of monitoring and evaluating the movement pattern of abrasive particles in three-body abrasion, 115
